

SARTHAK SRIVASTAVA

Chief Technology Officer (CTO) @ DevQBX | Project Manager @ Sitekraft.dev | Systems & AI Builder

Kanpur, Uttar Pradesh, India | +91 7985040858 | ss8971132@gmail.com | sarthakml.in
GitHub: github.com/sarvasva-dev | LinkedIn: linkedin.com/in/sarvasva | DevQBX: devqbx.in

PROFESSIONAL SUMMARY

High-impact Chief Technology Officer (CTO) at DevQBX and Project Manager at Sitekraft.dev with proven hands-on expertise architecting AI-assisted product pipelines, high-concurrency systems, low-latency financial alert infrastructure, and scalable web applications. BCA student at VSICS Kanpur (CGPA: 8.0 / 10). Strongest in converting complex technical and product specifications into deterministic production software, automated engineering workflows, bot-bypass pipelines, SQLite WAL concurrency, WebSockets real-time systems, and high-performance event management portals.

WORK EXPERIENCE

Chief Technology Officer (CTO) - DevQBX (devqbx.in) 07/2026 - Present | Kanpur / Remote

- Directing technical infrastructure, system architecture, and technology leadership for DevQBX, empowering 500+ builders and hackathon communities.
- Overseeing engineering standards, platform reliability, system design, API integrations, and developer mentorship under real-world constraints.
- Spearheading technical execution, hackathon ecosystems (QBX Arena), and collaborative developer growth initiatives.

Project Manager & Systems Architect - Sitekraft.dev 03/2026 - Present | Remote

- Leading end-to-end product delivery of Bulkbeat TV (bulkbeattv.com), an institutional-grade, real-time Telegram market intelligence engine.
- Engineered 22-rule deterministic scoring logic, cookie warming, and identity rotation to eliminate 90%+ noise and bypass bot detection on a 1GB VPS.
- Architected SQLite WAL concurrency (30s busy-timeout), OCR document enrichment, and market-day automated billing flows ("Hisab").
- Translating product specifications into sprint roadmaps, client deliverables, automated alert pipelines, and hardened Linux VPS deployments.

Machine Learning Intern - CodSoft 11/2025 - 12/2025 | Remote

- Developed supervised ML classification pipelines in Python with end-to-end data preprocessing, feature engineering, and model evaluation.
- Built practical NLP text classification (TF-IDF) and credit card fraud detection models with precision/recall optimization for imbalanced data.

FEATURED PROJECTS

Bulkbeat TV - Real-Time Market Intelligence Engine - Python AsyncIO, Sarvam AI, SQLite WAL, OCR bulkbeattv.com

- Scans 5+ raw exchange/media sources simultaneously with 22-rule deterministic AI scoring, filtering 90%+ noise before alerting in <5s.
- Engineered identity rotation and cookie warming to bypass bot detection; integrated Tesseract OCR fallback for scanned corporate filings on a 1GB VPS.

Code for the Nation 2026 - Hackathon & Event Live Platform - Node.js, WebSockets, Supabase, Express VSICS Hackathon Platform

- Architected real-time competition portal for 16 official teams with WebSocket live score broadcasting and instant leaderboard updates.
- Built role-based evaluator control panel, passcode-secured judging interfaces, and automated project repository submission workflows.

VB Events - Luxury Event Management Web Platform - Next.js, Tailwind CSS, Framer Motion, SEO vbevents.co.in

- Architected high-performance web application for a premier luxury event management brand; achieved #1 Google ranking for high-intent search keywords.
- Engineered media optimization pipeline (WebP/AVIF, zero-CLS blur placeholders, lazy-loading) achieving a 98+ Lighthouse score with sub-second loads.

Smart Galla - Geospatial Kirana Supply Chain Network - Next.js 16, PostgreSQL, Geospatial Sharding, LRU smartgalla.sarthakml.in

- Engineered Point-in-Polygon (PIP) geofencing with LRU cache, sub-100ms inventory hydration, and atomic PostgreSQL ledgers for 12M+ Kirana stores.
- Reduced database compute load by 60% via Supabase Realtime predictive delta sync; built WhatsApp-native B2B ordering bridge.

TECHNICAL SKILLS

Languages:	Python (AsyncIO), TypeScript, JavaScript, C, C++, SQL, HTML5, CSS3
Frameworks & Web:	Next.js 16, React 19, FastAPI, Node.js, Express, Tailwind CSS, Vite, WebSockets, REST APIs
AI / ML & Data:	Scikit-learn, Pandas, NumPy, NLP (TF-IDF), Sarvam AI, OCR (Tesseract), RAG Pipelines, Prompt Engineering
Databases & Cloud:	PostgreSQL, SQLite (WAL Mode), Supabase, Microsoft Azure (VMs), Linux VPS Hardening, Redis
Systems & Tools:	Git, GitHub, Playwright, Bot-Bypass Logic, Systemd, APScheduler, Docker, Postman, VS Code

EDUCATION

Bachelor of Computer Applications (BCA) - Dr. Virendra Swarup Institute of Computer Studies (VSICS) 2024 - 2027 | Kanpur, India

CGPA: 8.0 / 10 | Relevant Coursework: Data Structures & Algorithms, Advanced DBMS, Operating Systems, Computer Networks, Software Engineering

CERTIFICATIONS & HONORS

- AI/ML Systems Engineering - VSICS Specialized
- Generative AI & Data Analytics - Simplilearn Distinction
- National-Level Hackathon Finalist - ECLearnix Distinction
- Microsoft Azure Cloud Training - VSICS
- Machine Learning Internship Distinction - CodSoft
- Full-Stack Web Development Systems - VSICS Accredited
